

# ADAM HALL

## EDUCATION

---

UNIVERSITY	University of Michigan, Ann Arbor	In Progress
DEGREE	PhD in Statistics	
HONORS	I am a recipient of the Rackham Merit Fellowship.	
UNIVERSITY	University of Michigan, Ann Arbor	Apr. 2015
DEGREE	Master of Arts in Statistics	
UNIVERSITY	University of California, Irvine	Sept. 2011
DEGREE	Bachelor of Arts in Quantitative Economics	
DEGREE	Bachelor of Arts in Sociology (Honors)	
MINORS	Mathematics, Statistics, and Philosophy	

## EXPERIENCE

---

Graduate Student Instructor (GSI)	August 2013 — Present
I teach lab sections for introductory to intermediate level statistics courses. My duties have included lecturing about statistical tools and topics, explaining material in office hours, grading exams and homework assignments, writing questions for quizzes, and teaching students to use tools such as R and SPSS to analyze data.	
Bureau of Economic Analysis Intern	June 2015 — August 2015
I researched the estimation of price data, including the process by which raw price quotes are aggregated to regional price parities. I wrote press releases, reviewed data before release, and used SAS to produce supplementary tables for customers. I used SAS with data from the ACS Public Use Microdata Sample to estimate rents at the county level, and compared these estimates to estimates obtained using internal Census data.	
Graduate Research with Richard Gonzalez	September 2014 — January 2015
I conducted research relating to visualization and smoothing over time series where some data may be missing non-randomly. This has involved collaborating with Professor Richard Gonzalez using Git to write R scripts that use survey data and the ggplot2 package to generate visualizations for non-specialist audiences.	
Undergraduate Econometrics Research	April 2011 — June 2011
I wrote a study using data from publicly available sources to examine relationships between media penetration rates, corruption, and economic output. The data was cleaned using Microsoft Excel, and analyzed with sets of linear regressions in R.	
Undergraduate Research Opportunities (UROP) Fellow	September 2009 — June 2010
I conducted hour-long informational interviews with 16 leaders of 12 different organizations, and wrote a sociology thesis analyzing the factors influencing the choice and effectiveness of fundraising methods in each group. I presented my findings to the UC Irvine sociology department, and then at a UROP symposium.	

## SKILLS

---

Computer Languages	R, Python, SAS, HTML, CSS, Javascript
Statistical Packages	SPSS, EViews
Operating Systems	Microsoft Windows, Mac OS X, Debian GNU/Linux
Other Tools	Word, Excel, Powerpoint, Git, L <sup>A</sup> T <sub>E</sub> X

1701 BROADVIEW LANE, APT. 102 · ANN ARBOR, MI · 48105
